

**WATER AUTHORITY – CAYMAN**

**WEST BAY BEACH SEWERAGE SYSTEM  
PIPELINE REHABILITATION PROJECT (2009)**

**TENDER ADDENDUM No. 3**

**CLARIFICATION:**

1. A significant portion of the total length of 6-inch sewer lines (approximately 11,000 linear feet) has been previously repaired using the U-liner technology. At least one CCTV camera must therefore be small enough to be used in pipelines with an Internal Diameter (I.D.) of approximately 5.25”.
2. All vehicles used on the project must be licensed by the Vehicle & Driver's Licensing Department, and be insured using one of the local vehicle insurance companies. Both right-hand and left-hand drive vehicles will be allowed.

A Cayman Islands Driver's License is required to drive on Cayman roads. All drivers of the above-mentioned vehicles must therefore obtain a Cayman Islands Driver's License.

For more information on vehicle registration policies, contact the Department of Vehicle and Drivers' Licensing at 945-8344 or 945-8355.
